DETAILED ACTION

Election/Restrictions

Claim 40-61 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. The election was made **without** traverse in the reply filed on May 10, 2007.

Claims 40-61 have been canceled. Claims 1-39 are pending and will be considered for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Hartman et al. (US Patent 5,960,411)(“Hartman”).

Referring to claims 1-39: Hartman teaches a method in a media service system for transaction configuration, the method comprising the steps of: enabling at least one selection by a user of at least one transaction configuration option (col. 5, lines 9-26; col. 6, lines 39-63); and implementing at least one transaction process responsive to the selection of the at least one transaction configuration option (col. 7, lines 4-23), wherein the at least one transaction configuration option is a single execution transaction option, and wherein the implementing step implements the at least one transaction process responsive to at least one selection of the single execution transaction option to enable a subscriber to initiate and complete an entire purchase in one execution (col. 4, lines 31-38), wherein the one execution is the depression of a remote button (col. 4, lines 31-38), wherein the at least one transaction process is executed by at least one client device when a subscriber utilizes the at least one client device to complete a purchase (Figure 2, “220”; col. 5, lines 56-66), wherein the at least one transaction configuration option is a PIN option and wherein the implementing step implements the transaction process responsive to at least one selection of the PIN option requiring a correct PIN entry to complete a transaction (col. 5, lines 24-26), wherein the correct PIN entry enables a single execution transaction, the single execution transaction enabling a subscriber to initiate and complete an entire purchase in one execution (col. 5, lines 24-26), wherein the at least one transaction configuration option is a subscriber login option, and wherein the implementing step implements the transaction process

Art Unit: 3625

responsive to at least one selection of the subscriber login option, wherein the subscriber login option requires at least one subscriber login to complete a transaction (col. 5, lines 24-26).
